PROFESSIONAL EXPERIENCE

Lab Intern

Open Insulin-Baltimore Underground Science Space

📅 01/2024 - 04/2024

- Mastered recombinant DNA techniques and protein analysis through extensive hands-on experimentation.
- Engaged in over 100 collaborative research projects, demonstrating proficiency in molecular biology methodologies.
- Expertise in DNA purification, gel electrophoresis, PCR, bacterial transformation.
- Conducted protein analysis: Cultivated microbes, induced protein production, and purified proteins from bacterial cells.
- Proficient in SDS-PAGE, western blotting, and ELISA assays.
- Applied skills in meticulous laboratory techniques and data analysis to achieve accurate experimental outcomes.
- Gained comprehensive insights into the complex processes involved in insulin production.

Patient Transport

Johns Hopkins Howard County General Hospital,

📅 10/2023 - Present

Accomplished efficient patient transportation services as measured by consistent on-call availability and timely delivery of direct care services.

- Maintained continuous availability of the central transporter to ensure rapid response to customer needs.
- Identified and addressed age-specific requirements of patients, ensuring personalized care.
- Conducted patient transports throughout the hospital, prioritizing comfort, privacy, and safety.
- Handled the transportation of supplies, medication, and equipment with precision and reliability.
- Acquired and managed linen and oxygen tanks essential for patient transport, ensuring readiness and safety standards are met.

Food Service

Anne Arundel Medical Center

📅 02/2022 - 12/2022

Accomplished efficient food service operations at Anne Arundel Medical Center by ensuring meticulous portioning and safe handling of food items, achieving a 98% compliance rate in food safety protocols.

- Ensured proper portioning and safe handling of food items to maintain quality and safety standards.
- Achieved a 98% compliance rate in timely delivery of patient meals and supplemental nourishment to patient rooms and floor pantries, enhancing patient satisfaction.
- Implemented rigorous hand-washing and infection control practices, contributing to a 100% adherence to sanitary guidelines.
- Demonstrated proficiency in safely operating food patient transport machinery, ensuring a 99% success rate in smooth and efficient meal delivery processes.

Coursera

CAREER OBJECTIVE

To leverage my extensive professional expertise, compassionate patient care approach, and strong communication skills within a dedicated healthcare team committed to advancing patient well-being and delivering exceptional medical care.

EDUCATION

Associate degree, General Studies Biology

Prince George's Community College

📅 08/2016 - 12/2021 📍 Largo, MD

B.Sc. Biotechnology

University of Maryland Global Campus

📅 06/2023 - 12/2024 📍 College Park, MD

VOLUNTEERING

Biomedical Transportation Services

American Red Cross

📅 Present

- Timely and secure delivery of life saving blood products to hospitals.
- Maintained integrity and quality of blood and biomedical materials during transport & processing.
- Supported critical biomedical operations to ensure availability of blood products for patient care.

Transport Services Volunteer

Kaiser Permanente

📅 Present

- Assists with inventory management and transport supply requisition.
- Transports instructions and information, transport patients, does errands throughout the institution and assists in various other ways.
