Report on Server4Sale and Its Subsidiaries

I. Introduction

Server4Sale, established in 1998, has grown to be a leading global provider of technical solutions, offering a wide range of services including hosting solutions, security solutions, and website design and development. The company has expanded its operations across Asia, Canada, Europe, and the USA, earning recognition as an ISO-certified organization known for its commitment to innovation, functionality, performance, and efficiency.

II. Company Overview

History and Growth

Server4Sale started as a hosting solutions provider and gradually expanded into security solutions, website design, and development. The company's growth is marked by its dedication and motivation, transforming from a team of five to over 100 employees globally. Server4Sale's diverse service offerings have attracted a wide range of clients, including Fortune 500 companies, financial institutions, airlines, government organizations, and private firms.

Core Values and Vision

The company operates with a clear vision of achieving excellence in every service it offers. Server4Sale emphasizes customer satisfaction by ensuring reliability, quality, unbeatable performance, and security in all its solutions and services. The company's dedication to innovation and customer-centric approach has established it as a trusted partner in the industry.

III. Subsidiaries and Brands

1. BlockDoS

BlockDoS specializes in mitigation and detection services for Distributed Denial of Service (DDoS) attacks. With over 10 years of experience, BlockDoS provides global DDoS mitigation services that protect internet operations from service disruptions caused by DDoS attacks. Key features include a 99.9% uptime SLA, 30-minute implementation plans, and 24/7/365 support services.

2. Net4Sale

Net4Sale offers comprehensive network services, from design to monitoring and management. The subsidiary provides data center services, network design and management, system solutions, server-related solutions, co-location services, and monitoring services, ensuring continuity and efficiency for businesses.

3. SolsNet

SolsNet is a Canadian web solutions provider offering web design, development, and internet marketing services. The company focuses on creating unique, search engine-optimized, and fully functional website designs that enhance clients' online business goals. Services include e-commerce, newsletters, pay-per-click advertising, and search engine optimization.

4. Mybizsite

Mybizsite targets IT solutions for SMEs in Canada and the United Kingdom. Services include website design and development, SEO, and website maintenance. The subsidiary emphasizes cost-effective solutions, helping clients upgrade their corporate identity and optimize their online presence.

5. QuickSols

QuickSols provides a comprehensive range of IT security services, including security consultancy, SSL certificates, penetration testing, PCI compliance, digital IDs, IS audits, security scanning, IT audits, and managed services. QuickSols aims to enhance network security and optimize applications and database security.

6. Remote Admin

Remote Admin offers outsourced hosting support, server management, disaster recovery, cluster setup, hosting solutions, load balancing, and anti-spam services. The subsidiary ensures server maintenance, monitoring, and troubleshooting to keep services running smoothly and securely.

7. Webmaster my site

Webmastermysite (WMMS) is a US-based company providing web design, development, maintenance, and webmaster services. The company focuses on upgrading and maintaining websites, enhancing online visibility, and ensuring real-time support.

8. Spotty Web

Spotty Web is a Pakistan-based website design and development company offering unique web solutions. The subsidiary emphasizes understanding customer objectives and creating innovative designs that bridge the gap between clients and their customers. Services include hosting, maintaining, and updating websites.
